NETWORK HOST STATUS

This RFC reports on the status of most Network Hosts from April 10 to April 21. During this interval the IBM 360/44 at the University of Southern California (Network Address 23) was connected to the Network; also, a Terminal IMP was installed in Omaha, Nebraska at Global Weather Central (Network Address 152) on April 18.

Several Hosts are currently excluded from the daily testing. These Hosts fall into two categories:

1) Hosts which are not expected to be functioning on the Network as servers (available for use from other sites) on a regular basis for at least two weeks. Included here are:

| Network Address ----- | Site ---- | Computer ----- |
|-----------------------------|--------------|-------------------|
| 134 | MIT-AI | PDP-10 |
| 13 | Case | PDP-10 |

2) Hosts which are currently intended to be users only. Included here are the Terminal IMPs, which are presently in the Network (AMES, MITRE, NBS, ETAC, USC, GWC, and BBN*). This category also includes the Network Control Center computer (Network Address 5) which is used solely for gathering statistics from the Network. Finally, included among these Hosts are the following:

| Network Address ----- | Site ---- | Computer ----- |
|-----------------------------|--------------|-------------------|
| 7 | Rand | IBM-360/65 |
| 73 | Harvard | PDP-1 |
| 12 | Illinois | PDP-11 |
| 19 | NBS | PDP-11 |
| 23 | USC | IBM-360/44 |

The tables on the next two pages summarize the Host status for this period.

*The BBN Terminal IMP (Network Address 158) is a prototype and as such is frequently not connected to the Network, but being used to refine and debug the Terminal IMP programs.

| SITE ADDRESS ----- | SITE ----- | COMPUTER ----- | STATUS OR PREDICTION ----- | "STATUS OR PREDICTIONS" OBTAINED FROM ----- |
|--------------------------|---------------|--------------------|---------------------------------|--|
| 1 | UCLA | SIGMA-7 | Server # Limited | Jon Postel |
| 65 | UCLA | IBM-360/91 | NETRJS now (Telnet in April) | Bob Braden |
| 2 | SRI(NIC) | PDP-10 | Server | John Melvin |
| 66 | SRI(AI) | PDP-10 | Server | Len Chaiten |
| 3 | UCSB | IBM-360/75 | Server | Jim White |
| 4 | UTAH | PDP-10 | Server | Barry Wessler |
| *5 | BBN(NCC) | DDP-516 | Never | Alex McKenzie |
| 69 | BBN(TENEXA) | PDP-10 | Server | Dan Murphy |
| 133 | BBN(TENEXB) | PDP-10 | Server (Exper.) | Dan Murphy |
| 6 | MIT(Multics) | H-645 | Server | Mike Padlipsky |
| 70 | MIT(DM) | PDP-10 | Server | Bob Bressler |
| *134 | MIT(AI) | PDP-10 | User Now | Jeff Rubin |
| *7 | RAND | IBM-360/65 | User Only | Eric Harslem |
| 71 | RAND | PDP-10 | Server | Eric Harslem |
| *8 | SDC | IBM-360/155 | Server | Bob Long |
| 9 | HARVARD | PDP-10 | Server | Bob Sundberg |
| *73 | HARVARD | PDP-1 | Server | Bob Sundberg |
| 10 | LINCOLN | IBM-360/67 | "Soon" | Joel Winett |
| 74 | LINCOLN | TX-2 | Server | Will Kantrowitz |
| 11 | STANFORD | PDP-10 | "Soon" | Andy Moorner |
| *12 | ILLINOIS | PDP-11 | User Only | John Cravits |
| *13 | CASE | PDP-10 | June | Charles Rose |
| 14 | CARNEGIE | PDP-10 | "Soon" | Hal VanZoeren |
| *15 | AMES | ILLIAC (B6500) | Server | John McConnell |
| 16 | AMES | IBM-360/67 | "Soon" | Wayne Hathaway |
| *144 | AMES | TIP | User Only | |
| *145 | MITRE | TIP | User Only | |
| *19 | NBS | PDP-11 | User Only | Robert Rosentha |
| 1 | | | | |
| *147 | NBS | TIP | User Only | |
| *148 | ETAC | TIP | User Only | |
| | USC | IBM-360/44 | "Soon" | |
| *151 | USC | TIP | User Only | |
| *152 | GWC | TIP | User Only | |
| *158 | BBN | TIP (Prototype) | User Only | |

*Host not included in daily testing.

#The NMC is a research site and would like to have prior arrangement with each user.

where

D = Dead (Destination Host either dead or inaccessible [due to network partitioning or local IMP failure] from the BBN Terminal Imp.)

F = Full (Destination Host opened a connection, informed user that all Network ports were in use, and immediately closed the connection.)

H = 1/2 Open (Destination Host opened a connection but then either immediately closed it, or did not respond any further.)

O = Open (Destination Host opened a connection and was accessible to users.)

R = Refused (Destination Host returned a CLS to the initial RFC.)

T = Timed out (Destination Host did not complete the ICP and open a connection within 60 seconds.)

*The only service currently offered by the UCLA IBM-360/91 is a

Network Job Service (NETRJS), however, the BBN Terminal IMP is not equipped to test NETRJS. We are assuming that initial connection to the NETRJS logger indicates that NETRJS is also functioning. #These sites advertise that they may not have their system available at these times.
